

## Product Manager

### Chester

Data8 are an ambitious company looking to expand their team in their real-time validation division, Integr8, with the addition of an experienced Product Manager. The role will be to develop a business strategy for Integr8 and bring to market new products and services.

Integr8 is the industry leading Software as a Service (SaaS) for the completion of real time data capture and validation. This is backed by an unrivalled integration package which allows companies to constantly monitor and validate their data.

#### The role of the Product Manager will include:

- Responsible for the strategic direction of Integr8's suite of services
- Working with sales to achieve revenue targets
- Manage product development
- Launch new products within an agreed budget

#### Desired Skills & Experience for the Product Manager:

- Energetic, motivated and results driven
- Must be able to demonstrate Production Management skills
- Good IT skills and eye for detail
- Understanding of CRM systems
- Competent communicator to evangelise on behalf of Integr8
- 2+ years of experience in Product Management
- Strong understanding of customer and market dynamics

Salary commensurate with experience
